Sessions

Dr. Steven Conway presents:
Documentation and Informed Consent

Friday, September 28 4:30PM-8:30PM
4 Hours Risk Management Credit

The "check your fear at the door" Medicare documentation and compliance program:

It is time for chiropractors to remove any fears of being audited by Medicare. Dr. Conway's unique dual professional degrees as a chiropractor and attorney provides him the opportunity to fulfill his passion to protect and enhance the chiropractic profession. A very energetic presenter, Dr. Conway, along with Dr. Jacklitch, has transformed Medicare for the chiropractic profession. Dr. Conway has directly worked with CMS and all of the Medicare contractors on a four-year project to create a universal solution and agreement on what is necessary for proper chiropractic Medicare documentation. The result of this universal agreement has for the first time in history reduced the national chiropractic error ratio gaining praise from CMS. Having personally trained the Medicare audit review staff, his very practical Medicare presentations removes all fears and shows a direct and easy path for chiropractors to properly document Medicare cases. **Sponsored by ChiroHealthUSA.**

Dr. Kristina Petrocco-Napuli presents:
Chiropractic Care for Women's Wellness—Part I & Part II

Saturday, September 29 8AM-12PM & 2PM-6PM
8 Hours CE Credit

It is widely known that females tend to seek chiropractic care more frequently than males. There are many complaints that are unique to females which correlate to the life phase. In addition to internal physiological factors, there are many external and societal factors that can contribute to our patients conditions. During this course Dr. Petrocco-Napuli will discuss common conditions seen in chiropractic practices which are specific to the female population as well as the biomechanics, societal influences and special populations. **Sponsored by Foot Levelers.**

Sessions

Dr. Laney Nelson & Dr. Tyler Nelson present:
The Management of Manipulation Treatment and Blood Flow Restriction Training

Saturday, September 29, 8AM-12PM & 2PM-6PM
8 Hours CE Credit

This presentation will be a hands on seminar designed to manage chronic pain with manipulation in the face of the opioid crisis. There will be audience participation addressing the middle and deep layers of joint stability to support manipulation procedures. There will be a number of BFRT bands available for teaching and demonstration during the exercise portion of the lecture. Attendees are encouraged to wear loose clothing and or work out apparel during the course. **Sponsored by Protecspine & Go B Strong.**

Dr. Timothy Wakefield presents:
Compliance Standards

Sunday, September 30 8AM– 12PM
4 Hours Risk Management Credit

Healthcare compliance can be confusing and feel overwhelming. Dr. Wakefield prides himself on making the complicated simple. Understanding the rules is a key factor when developing a compliance program for your clinic OR choosing an organization to interface with, to help you get and stay compliant. He will help you understand general healthcare compliance for individual and small group practices, fraud waste and abuse, HIPAA and OSHA in an easy to learn format. You will then be able to develop your own compliance program OR have the knowledge to find an organization that will help you get and keep you compliant. Having a quality compliance program, protects your patients, employees, billing, documentation and your practice in general. Having a quality compliance program allows you to sleep well at night. Understanding healthcare compliance as it relates to the chiropractic profession does not have to be hard. Dr. Wakefield will help to give you the confidence you need to make good compliance decisions for your practice. **Sponsored by ChiroHealthUSA**
